

Break  
by Norway Says

## A much needed break

Ever observed how we prefer to sit and behave when we are waiting for something in public areas? Rather alone while we are avoiding everyone's eyes, trying desperately to act like we're too concerned with our own business. BREAK respects this human behaviour. The angle of the back and the seat that is split in two make you turn away from strangers. In that way BREAK makes it possible for you to do some serious thinking while you wait.

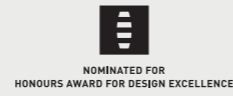

See page 110 for complete specifications

# Break
