

Modell 711
by Fredrik A. Kayser

For years
to come

Fredrik A. Kayser foremost designs are characterised by a Danish inspired and Scandinavian tone. Among them is the armchair MODELL 711. Kayser designed the armchair in 1960, and the same year MODELL 711 won first prize in the Industry Council for Furniture and Furnishing Industry chair competition. Despite having clear references to the mid-century design era, the chair stands out as a timeless piece. MODELL 711 is just as relevant today as it was when it was designed, and its Nordic aesthetic makes it easily adapt to modern architecture. MODELL 711 stands out as a Norwegian design icon that will last for years to come.
