

Mio by Takagi/Homstvedt

 Hjelle

You may recognize Mio's design details from our Ami series, also designed by Takagi/Homstvedt. But Mio has a life of its own with its simple yet well thought through details, it compliments any interior.

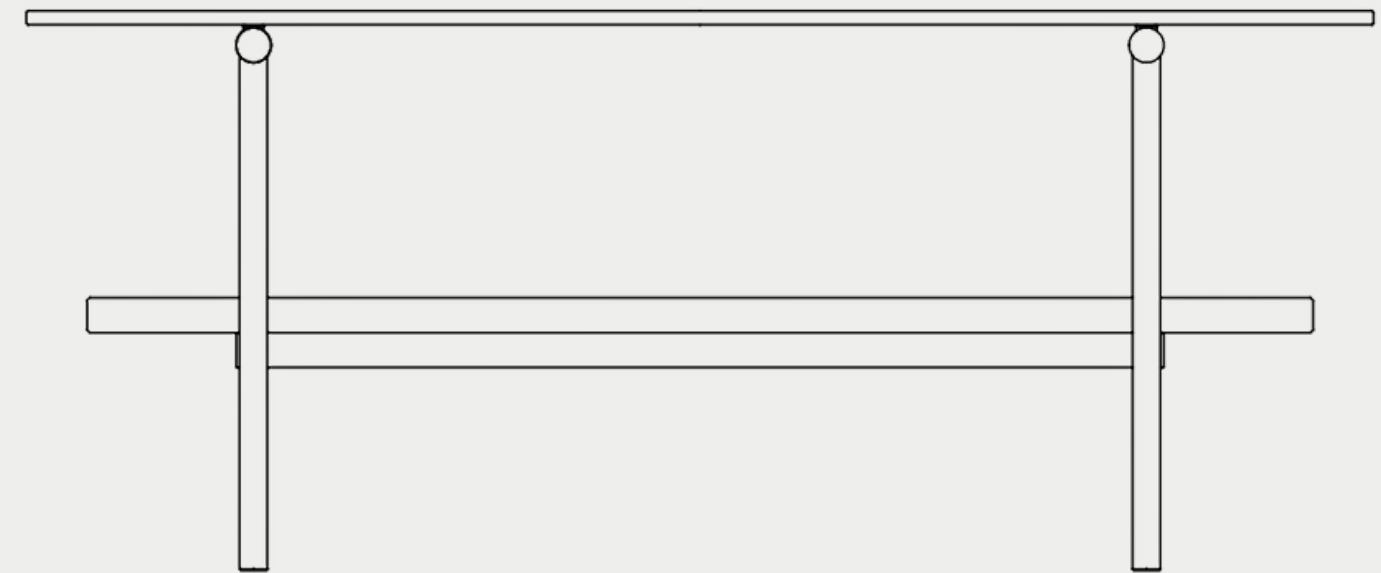

Featuring a lapped steel framework that supports two circular plates, Mio simultaneously references modernist architecture with its daring cantilevers and the primitive legibility of Enzo Mari's Autoprogettazione.

Takagi/Homstevdt

While Hallgeir Homstvedt and Jonah Takagi have been friends for years, their first collaboration as designers came in 2016 as part of an exhibition curated by the influential design blog Sight Unseen and sponsored by the Embassy of Norway. To date they have designed and developed products for a range of international brands that include Roll & Hill, Le Klint and Design Within Reach, and now Hjellev with their AMI and Mio series.
